

Breakout Groups #1

Instructions:

Assign:

- A person to take notes and share your discussion with the full group

The (PQ-B) Prodromal Questionnaire-Brief and Structured Interview for Psychosis Risk Syndrome (SIPS) are 2 tools that can be used to identify individuals who are eligible for EASA under Clinical High Risk for psychosis (CHRp)

Discussion Prompts:

- 1) Is your EASA program currently serving individuals identified as CHRp using the SIPS?
 - a. If so, how has the SIPS and/or the PQ-B been helpful in assessment and treatment planning for these individuals and their family members and supports?
- 2) What additional tools or resources do you need to assist you in providing high quality, individualized care for individuals identified as meeting criteria for CHRp?
