

Your Voice Matters! EASA Listening Session

The EASA Center for Excellence team with the OHSU-PSU School of Public Health is visiting your EASA program to talk with EASA family members, supports, participants and graduates about what is going well, explore opportunities for additional support and resources, and gather ideas to help the program grow even stronger.

The group listening sessions are generally 1 hour in length. Each individual who attends the listening session or submits an online survey may elect to receive one \$50.00 Amazon gift card via email approximately 2 weeks after the visit for their participation.

Examples of types of questions that may be asked are:

- What are you currently working on as part of your EASA care?
- What have been the most useful or helpful parts of your EASA care?
- What suggestions do you have for improvements to EASA services?

If you're interested in participating, RSVP to your team to participate in person. Food will be provided, please let your team if you have any dietary restrictions.
